A. Your Energy Insight

Customers with multiple meters receive an Energy Insight based upon the sum of all meters that are on the account.

B. Total Monthly Cost

A Total Monthly Cost graph shows New Charges for each month for the past 13-months. The current month displays furthest to the right. As a note, this graph will not include credits, adjustments and other charges.

Multiple Meters

Customers that have multiple meters on one account receive a slight variation of bill. The first page of the bill shows a summary of their account, while the following pages give detailed information on each of the meters.

Supplier Message
Standard Offer

Your electricity price for Standard Offer service for the period of January 1, 2022 through December 31, 2022 is \$0.116840 per kWh.

About Your Energy Supply

You're on Standard Offer. Did you know you can choose your Energy Supplier? Versant Power does not supply energy, but provides billing & payment services on behalf of your electricity supplier.

Billing Terminology

kWh (kilowatt hour)

The amount of electricity you use is measured in kilowatt hours (kWh) by a meter. For example, a 100-watt light bulb used for 10 hours will consume 1,000 Watt hours, or one kWh.

Estimated Bill

If we are unable to obtain a scheduled meter reading, your bill will be estimated based on the amount of kWh consumed based on past usage.

Sales Tax Exceptions

Maine state sales tax does not apply for the first 750 kilowatt hours (kWh) of residential usage.

Late Payment

The amount not paid by the Due Date on the bill will be subject to a late payment fee of 0.267% on the unpaid balance.

Payment Arrangement

If you have trouble paying your bill, a payment arrangement may help. Please call customer service for more information.

Delivery Rates

Maine's rates are approved by the Maine Public Utilities Commission. Copies of our rate schedules are available online at www.versantpower.com

Distribution

This recovers the costs of the local system, poles, wires and substations, that delivers power from the transmission system to your home or business.

Transmission

This recovers the costs of the high-voltage system that transports bulk power.

Stranded Costs

These include the costs of energy resource obligations entered into before electric industry restructuring. Also included are costs and benefits related to more recent long-term contracts required through state policy, such as contracts with renewable generators.

Conservation

Efficiency Maine Trust was created by the Legislature to deliver energy efficiency programs and services. It is funded in part by Conservation, a fee on electricity use.

C. Detailed Information per Meter

1. Meter (Service #)

A clear header distinguishes the meter and service number.

2. 2-Year Energy History

Each meter has a two-year rolling historical usage graph, showing consumption in kWh, above the meter read.
